OrderEx - Express way to Pay

Project

OrderEx is the first solution built to enhance the dining experience. By giving full access to the menu inside of a diner's device, the server can handle more tables efficiently while diner's control the pace of their meal.

Background/Challenges

Contactless solutions need to be implemented more than ever, the way for a safer experience for customer. This is posing multiple challenges like below.

  i. Menu browsing , ordering

  ii. Integration with Restaurant order desk, server alerts

  iii. Multiple payment integrations

Approach/Solution

OrderEx app provides following facility

- OrderEX makes ordering from your server quick and easy at your favorite restaurant. Simply enter your table # and dive into a full interactive menu where you can order anytime and pay your tab when you're done.
- OrderEx makes it easy to order your food and pay directly from your mobile devices.
- Call server - to alert server right away
- Credit Card Payment and swipe to pay
- Split Check
